Mike,

I mentioned in my presentation to the Shrimp Committee/APs that the Florida Museum of Natural History (FMNH) maintains the National Sawfish Encounter Database. We have also been working with the FMNH on sawfish education and outreach, and they have a very comprehensive sawfish website (http://www.flmnh.ufl.edu/fish/Sharks/sawfish/). It has a lot more information than I had time to share at Tuesday's meeting and should be really helpful. as people continue to consider this issue. I highly encourage the Shrimp Committee/AP members to check it out. Can you please pass this email along to them?

Thank you,

Jennifer Lee
