---

Sir:  lots of Red Snapper here in NC waters 20- 30 miles out. The last several trips we have caught and released more red snapper ( in poundage) than all other fish caught combined. We seem to limit out on Black Sea bass, catch many vermilion, almaco jacks, triggers and porgies and grunts.
Most red snapper are between8-14 lbs. sometimes we move to get away from them.
I guess the regulations have replenished the supply or so it seems to me.
How about allowing one per day per angler?
Sincerely
Joe Shary
