Dear Council,

We have been catching small amounts of wreckfish for the last few years; anywhere from a couple of fish to over 1,000 lbs using just bandit gear. Last week I geared up with a wreckfish reel and bought out two share holders (paperwork isn't finalized w/ permit office, yet); this brings my total shares to 50,000. After the 87% reduction I will have 6,5000lbs. Please do what you can to keep us in this fishery.

The idea of allocating 5% to the recreational sector is absurd. Sport and private charter boats are already skimming fish and not at all accountable. There is no sport in this style of fishing; wreckfish should remain 100% in the commercial sector.

Because of an accountable IFQ system this is a helathy fishery I hope to participate in for a long while. Please allocate reverted shares to active fishermen.

Sincerely,
Pete Boehm
