Southeast Region Commercial Electronic Logbook Reporting – Pilot Study

Pilot Project Description and Timeline

- Initial project stage (pilot testing) will involve:
 - Hiring contractors to perform outreach and equipment installation
 - Working with vendors on equipment specifications & systems requirements
 - Testing & modifying the available software for use in the SEFSC region
 - Outreach effort to recruit fishermen to test system
 - Testing the prototype systems on coastal (Gulf & South Atlantic) & pelagic (Atlantic) fisheries
- Estimated duration of initial project stage is 12-18 months which started last August 2013 (estimate one month delay due to shutdown and contracting changes)

Southeast Region Commercial Electronic Logbook Reporting – Pilot Study

Pilot Project Description and Timeline

- Update on Pilot Project Activities:
 - SEFSC staff are developing data standards, which will have to be met by vendors (**delayed due to government shutdown**)
 - Outreach specialist and marine technician still need to be hired (negotiating with contract office)
 - Started working with four vendors to identify system requirements and modifications needed (**delayed**)
 - Ten PCs and Four tablets already purchased for testing e-logbook system prototypes
 - Selection criteria for the 10 vessel participating in this pilot project is currently being developed (**delayed**)
- Once feasibility of prototype is established, full-scale implementation of Commercial Electronic Logbook Reporting Project can commence in 2016 depending on future budget allocation & priorities
