

Southeast Reef Fish Survey Coastal Trawl Survey

2024 Sampling Activities and Relative Abundance Trends

Tracey Smart, Margaret Finch, Julie Vecchio,
Walter Buble & Amy Zimney (SCDNR)
Nate Bacheler (SEFSC)

April 2025 SSC Meeting

Presentation Overview

SERFS then CTS

Survey Design

2024 Activities

Abundance, Length & Distribution for Selected Spp.

2025 Planned Activities

Relative Abundance Overview

Caveats

- Not an update of stock status
- Constraints, stratification, units, and models may be different from those used in (SEDAR) stock assessments
- May not have been reviewed in a SEDAR or other assessment framework

Southeast Reef Fish Survey (SERFS)

Current Funding & Sampling:
MARMAP + SEAMAP-SA + SEFIS

Historical Funding & Sampling:
MARMAP

Marine Resources Monitoring, Assessment & Prediction Program (SCDNR)
Southeast Area Monitoring & Assessment Program - South Atlantic (SCDNR)
Southeast Fishery-Independent Survey (SEFIS)

Chevron Video Trap (CVT) Sampling

- Target low to medium relief, hard-bottom habitats
- Depths ~15-110 m
- April 15 - Oct. 14
- Trap used consistently and standardized since 1990
- Baited with menhaden, soak time \approx 90 minutes
- Since 2011: all traps have at least 2 video cameras

CVT Universe

- ~ 4,300 trap sampling stations (NC-FL)
- Simple, random selection
- ~ 1,500 targeted in 2024

Sample and data processing & analyses

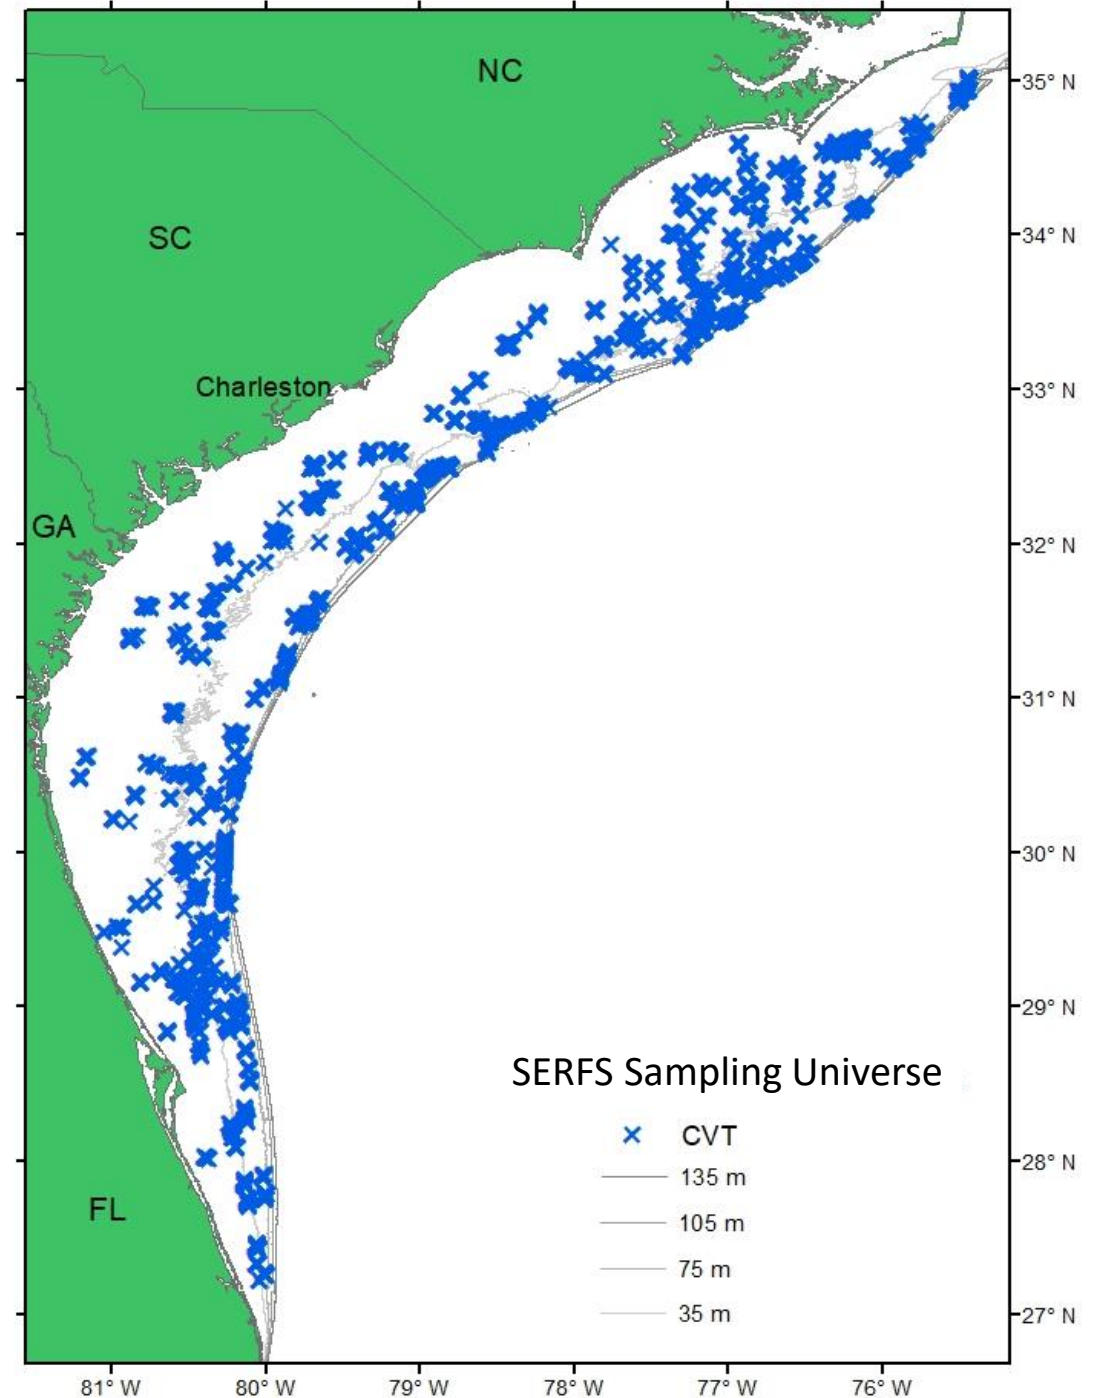

MARMAP/SEAMAP-SA (SCDNR):

- Catch indices
- Life history

SEFIS (SEFSC)

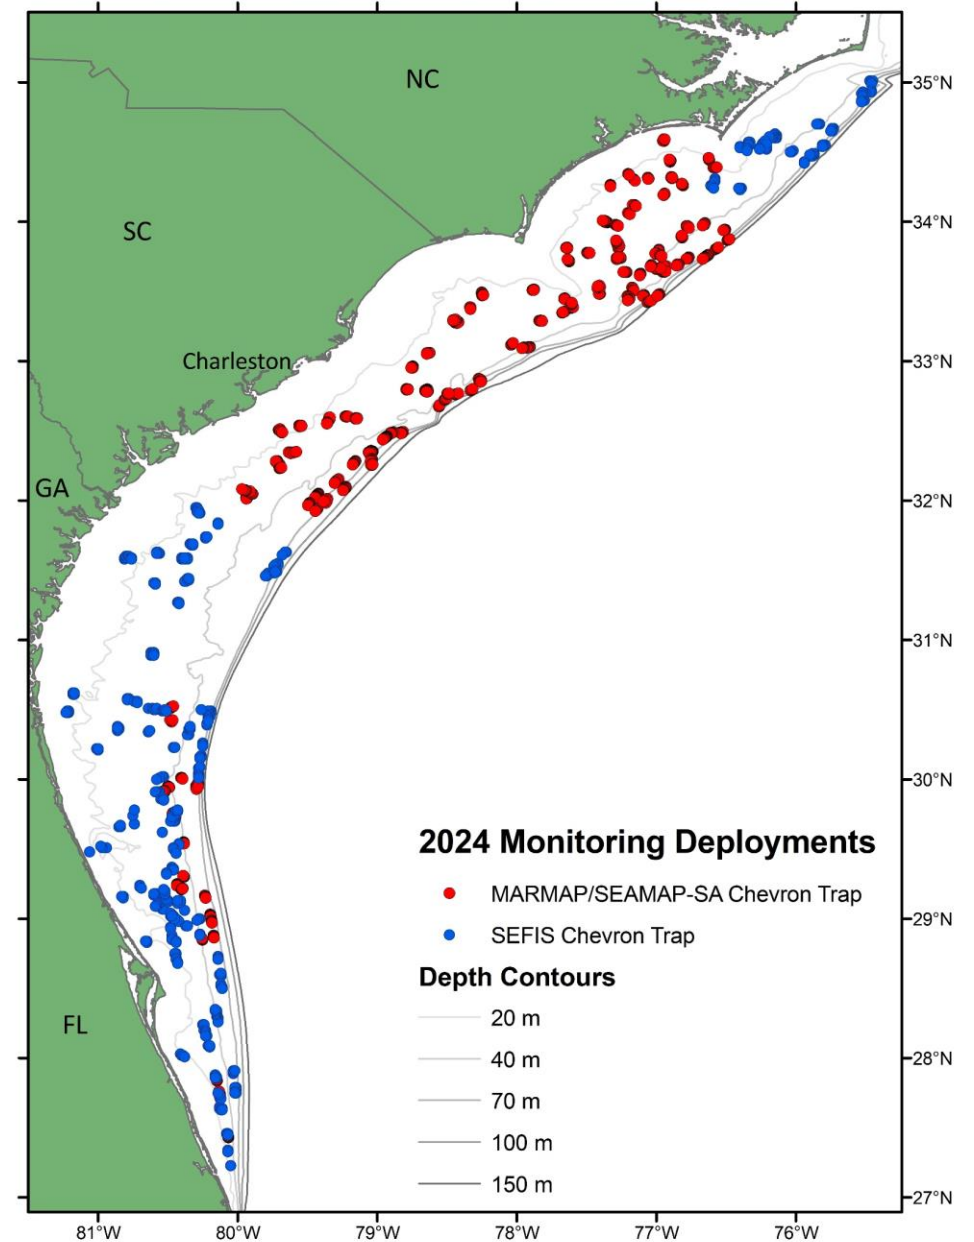

- Video indices

Publicly-available data SEAMAP.ORG

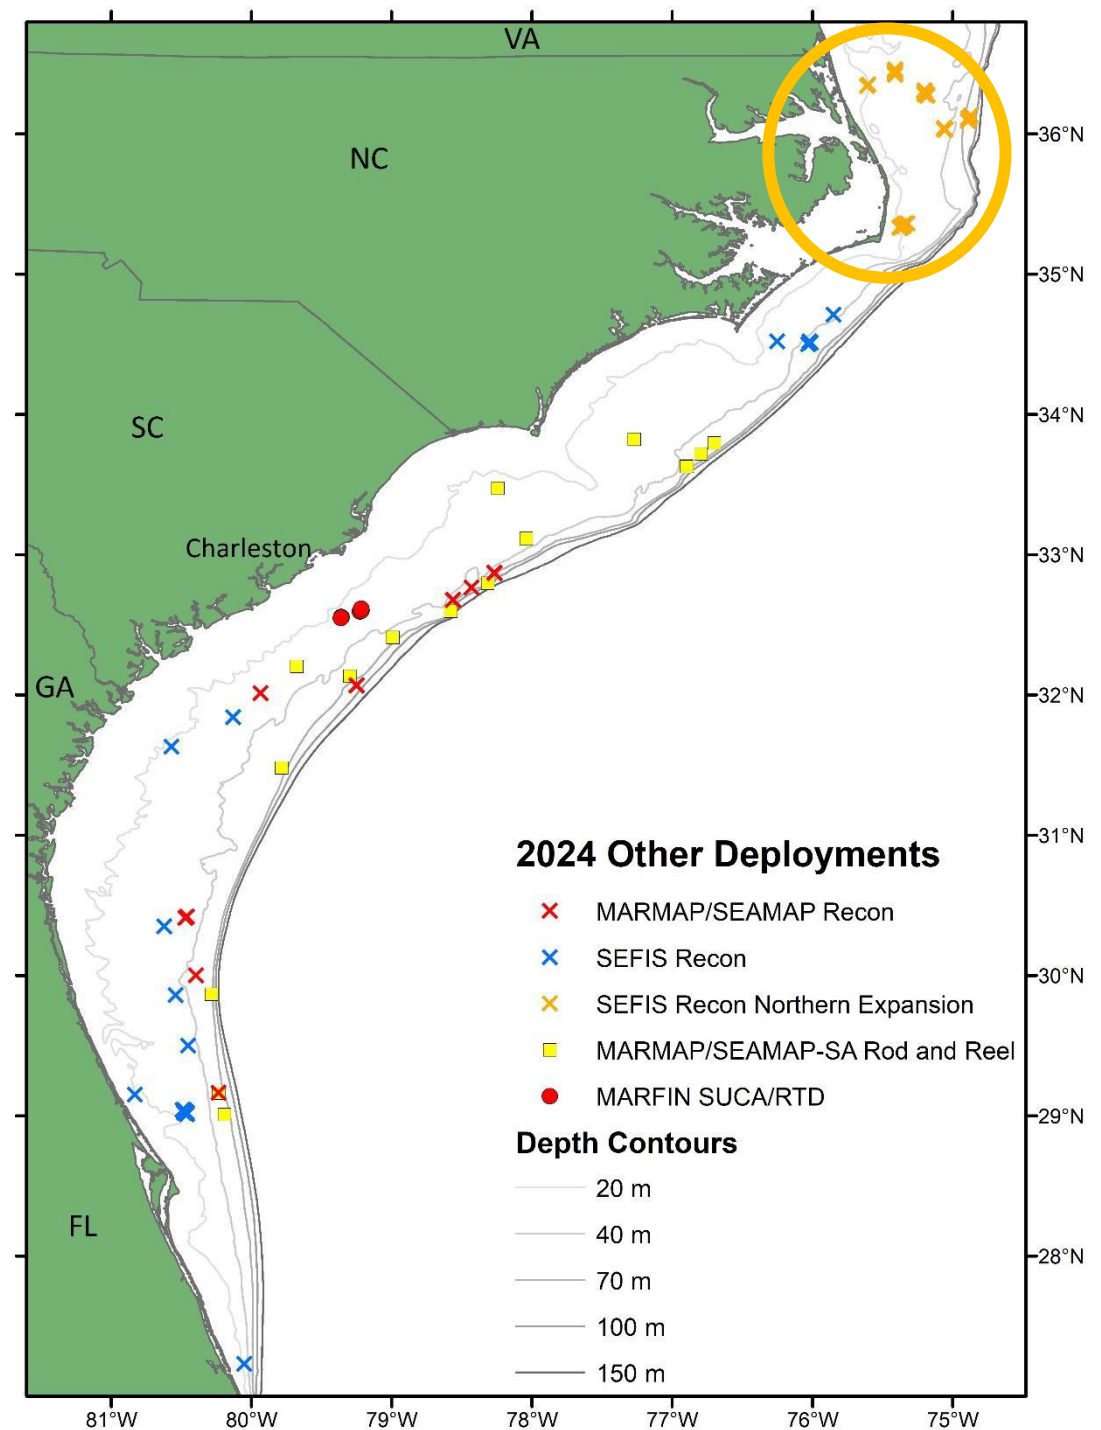

2024 SERFS Core Activities

- **79** days at sea (+ 20 mapping days)
 - **1,503** CVTs
 - **234** CTD casts
- **CVTs = 25,476** fish (~**80** species) collected, measured, weighed
- **5,984** fish (~**30** species) retained for life history (age, reproduction, DNA)

2024 SERFS Supplemental Activities

- Northern Expansion

SERFS Distributions- Example

- Only CVT catch
- Catch abundance in quintiles (5 bins)
 - # fish / trap hour
- 5 most recent years: 2019 & 2021-2024
- Cooler colors => lower nominal abundance
- Warmer colors => higher nominal abundance
- White => no sampling

CVT Relative Abundance

- Catch index (1990-2024)
- Video index (2011-2023)
- No sampling in 2020 (COVID-19)
- Standardized using Zero-Inflated Negative Binomial model (ZINB)

Most appropriate method, reduces uncertainty

Catch:

- Number of fish
- Trap soak time

Video:

- SumCount
- 10 min after trap lands on bottom
- One snapshot every 30 s for 20 min

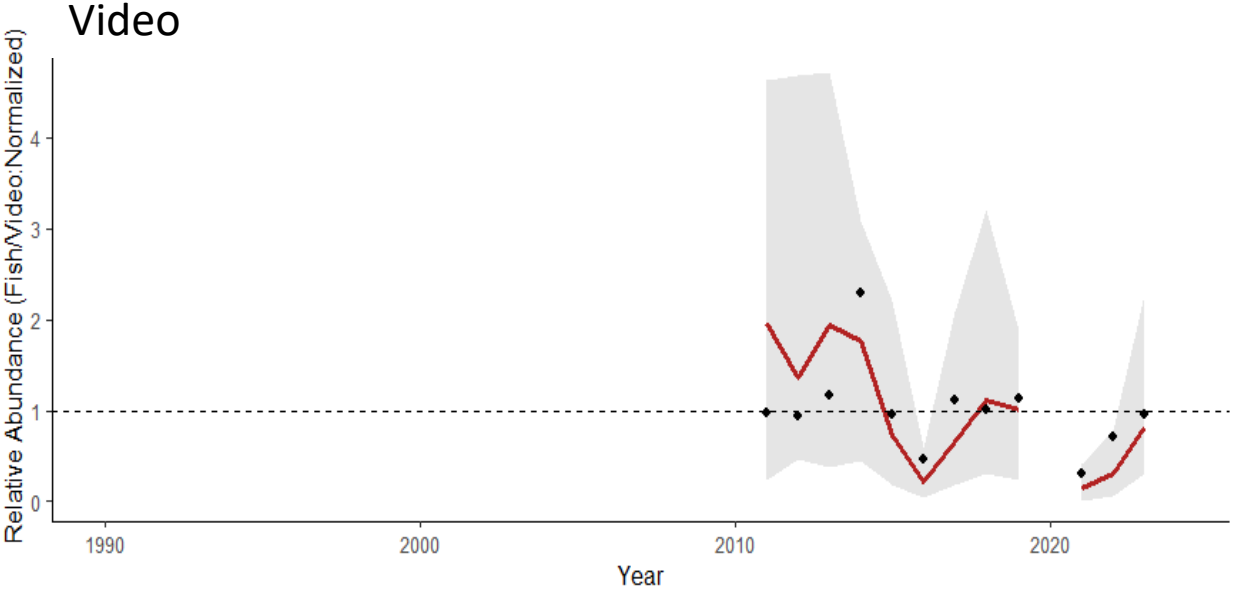

SERFS Indices- Example

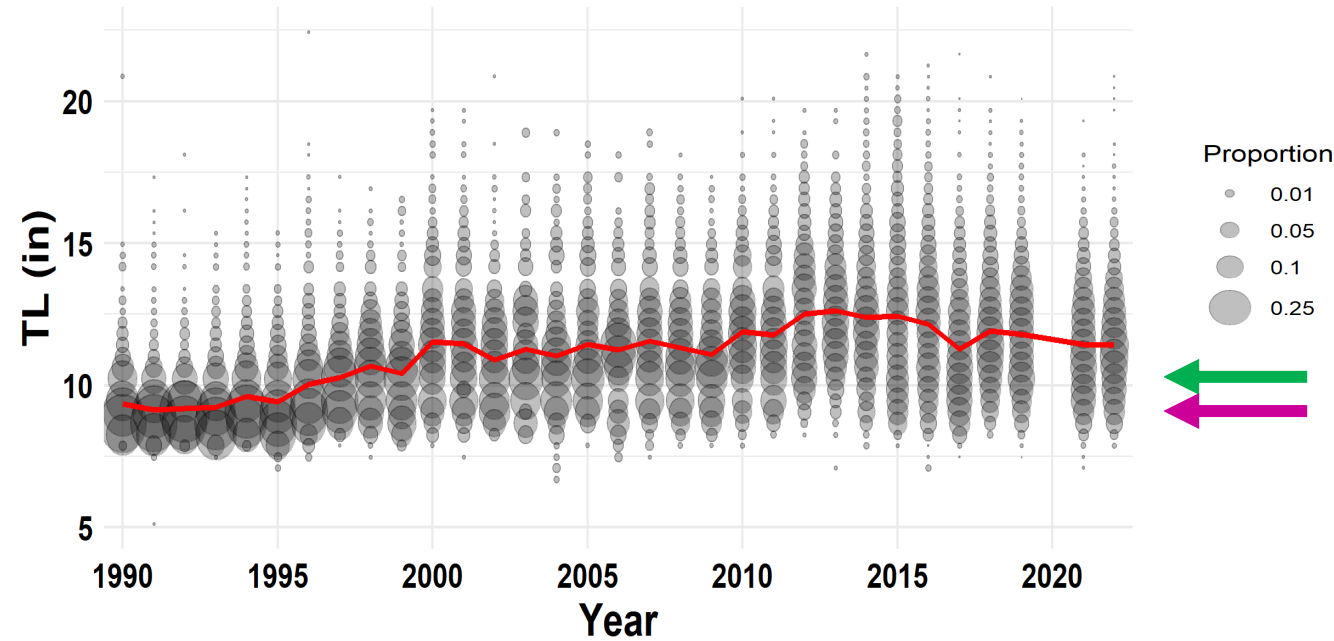

Normalized to long-term average
(dashed or solid line at 1)

- 2 = twice long-term average
- 0.5 = half long-term average

Gear	ZINB Index	95% C.I.	Nominal Values
CHV	Red Line	Gray Shading	Black Dots

SERFS Length Compositions- Example

- Catch Only
- Maximum (Pinched) Total Length (in)
- 1-in Length Bins
- Bubble size = # fish in length bin / # fish measured in a year
- Red Line = Average TL
- Green Arrow = Commercial MSL
- Pink Arrow = TL at 50% Maturity, Female
- "Missing" length bins in some graphs are result of converting between FL & TL and rounding

Selected Species

2024 CVT Catch Rankings

1. Tomtate*

2. Vermilion Snapper

3. Black Sea Bass

4. Red Snapper

5. Gray Triggerfish

6. *Stenotomus* spp.*

7. Red Porgy

9. White Grunt

16. Gag

17. Red Grouper

19. Almaco Jack

21. Scamp

Mixing?

2025 SERFS Plans

R/V *Palmetto*

R/V *Savannah*

NOAA Ship *Pisces*

Sampling Season:

Mid-April → Mid-October

4 vessels- Chevron Video Trap

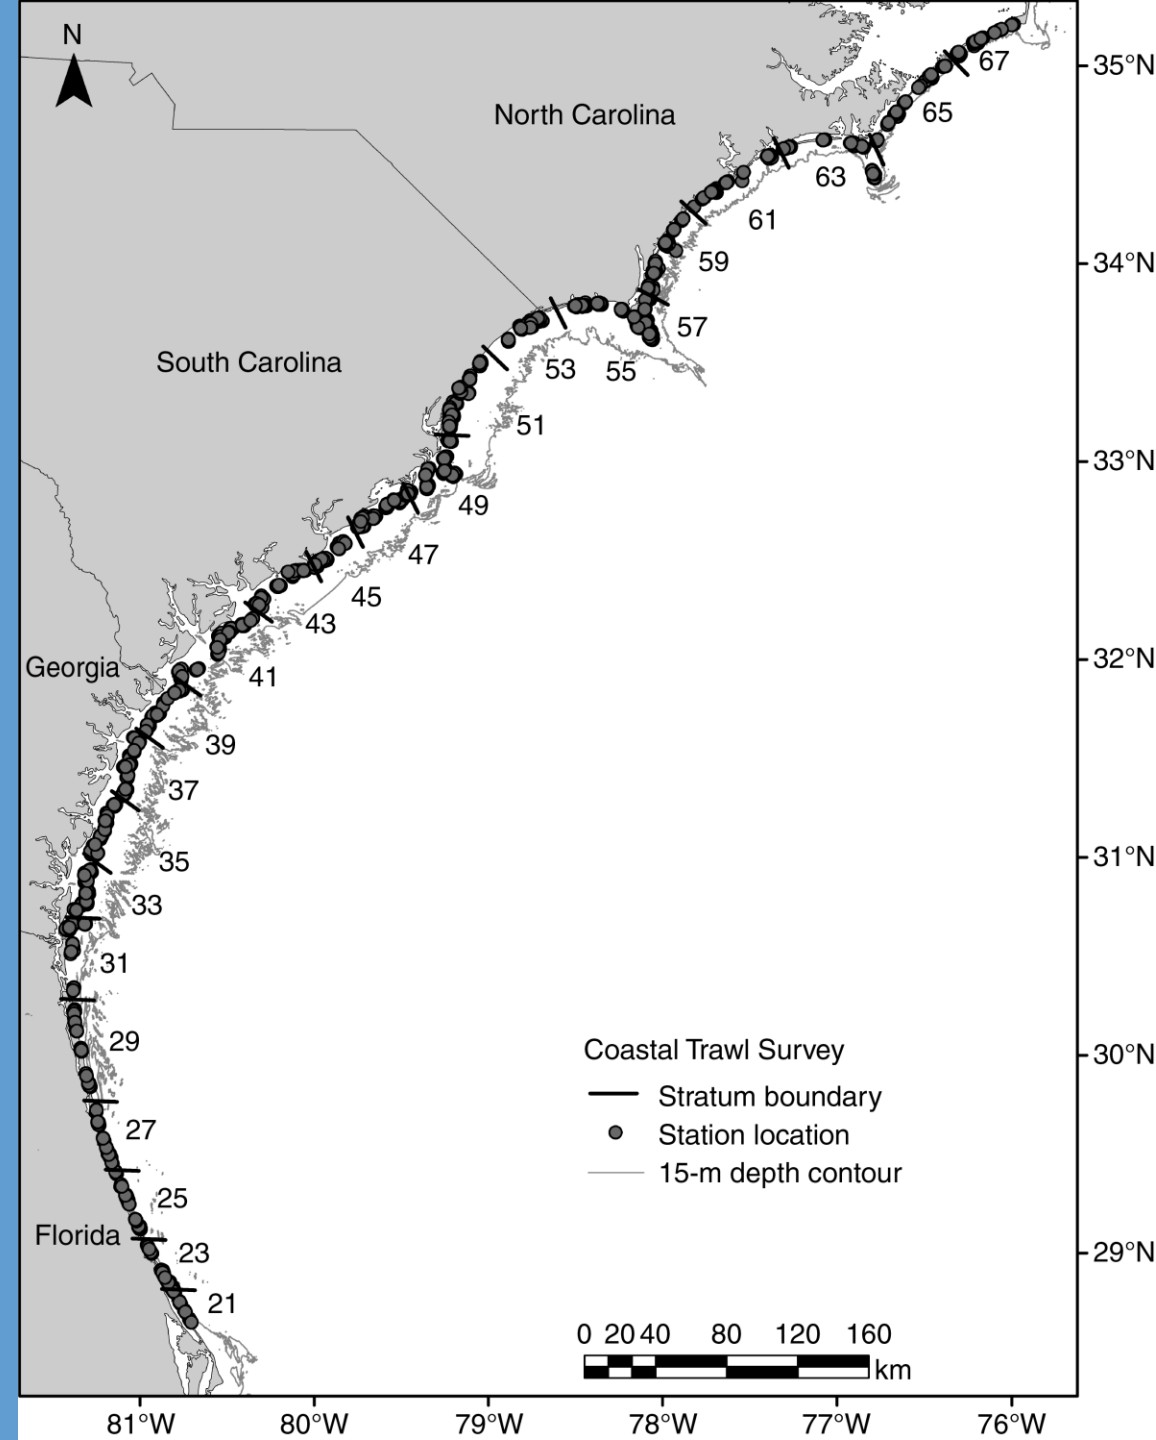

Southern Expansion (w/ FWRI) camera pods

R/V *Lillian*

Coastal Trawl Survey

- Funded through SEAMAP-SA
- Stratified, random sampling design
 - 24 latitude-based strata
 - Fixed stations, annual random selection
 - Target stations 102 per season
- 2021: one net processed
- 2023: Spring, Summer, Fall to Spring, Fall
- 2024: Vessel and Gear Changes

Coastal Trawl Survey

- 2024 Vessel and Gear Changes
- R/V Lady Lillian, stern trawler
- 60' Webster Trawl (high rise, flat net)
- Same mesh sizes
- Net Geometry to correct effort
- DOY, not Season, for Index Calculations
- ZINB standardization

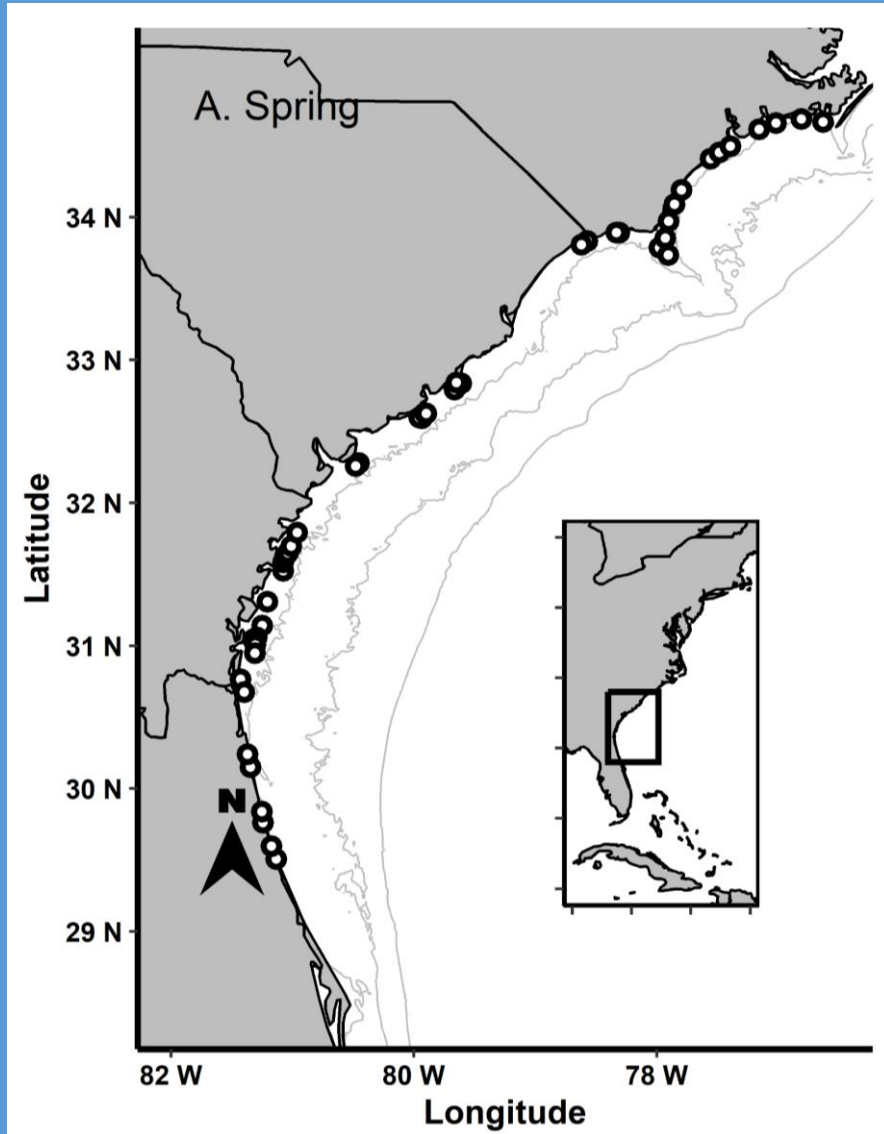

R/V *Lady Lillian*

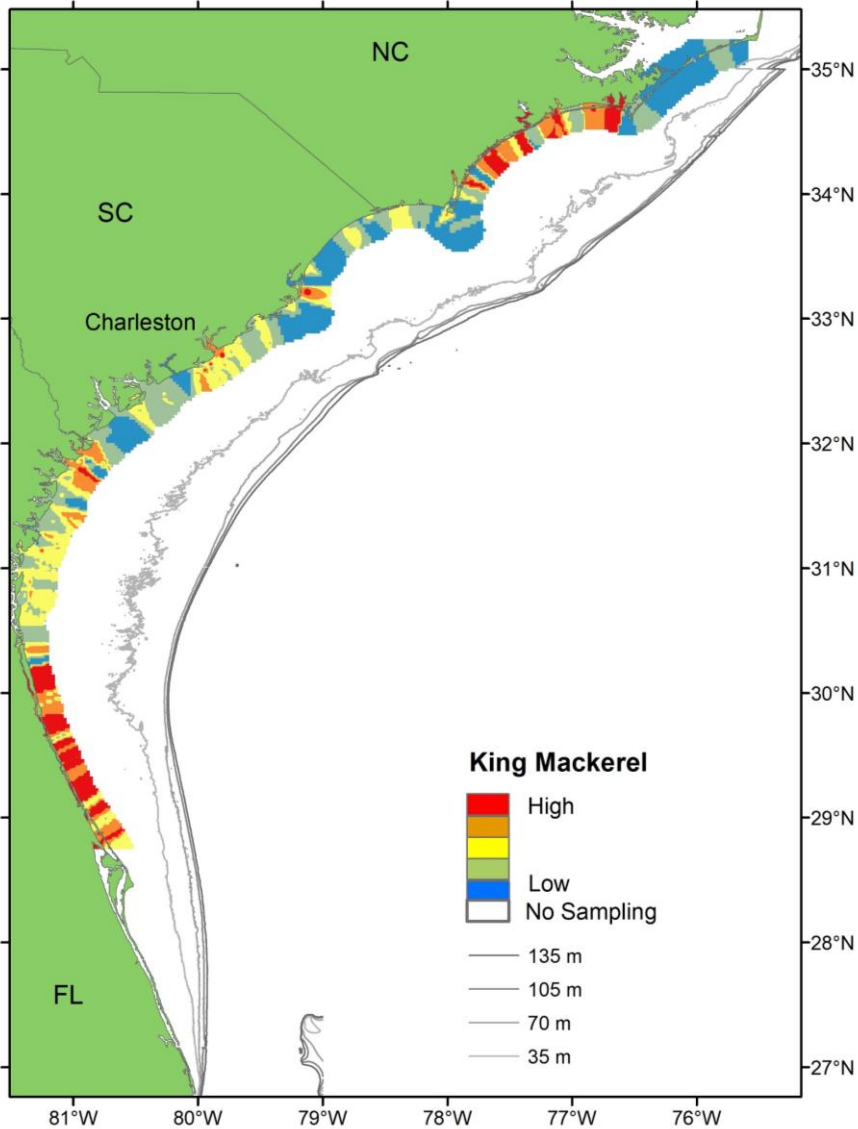

Coastal Trawl Sampling Effort 2024

46 of 102 stations sampled in “Spring”

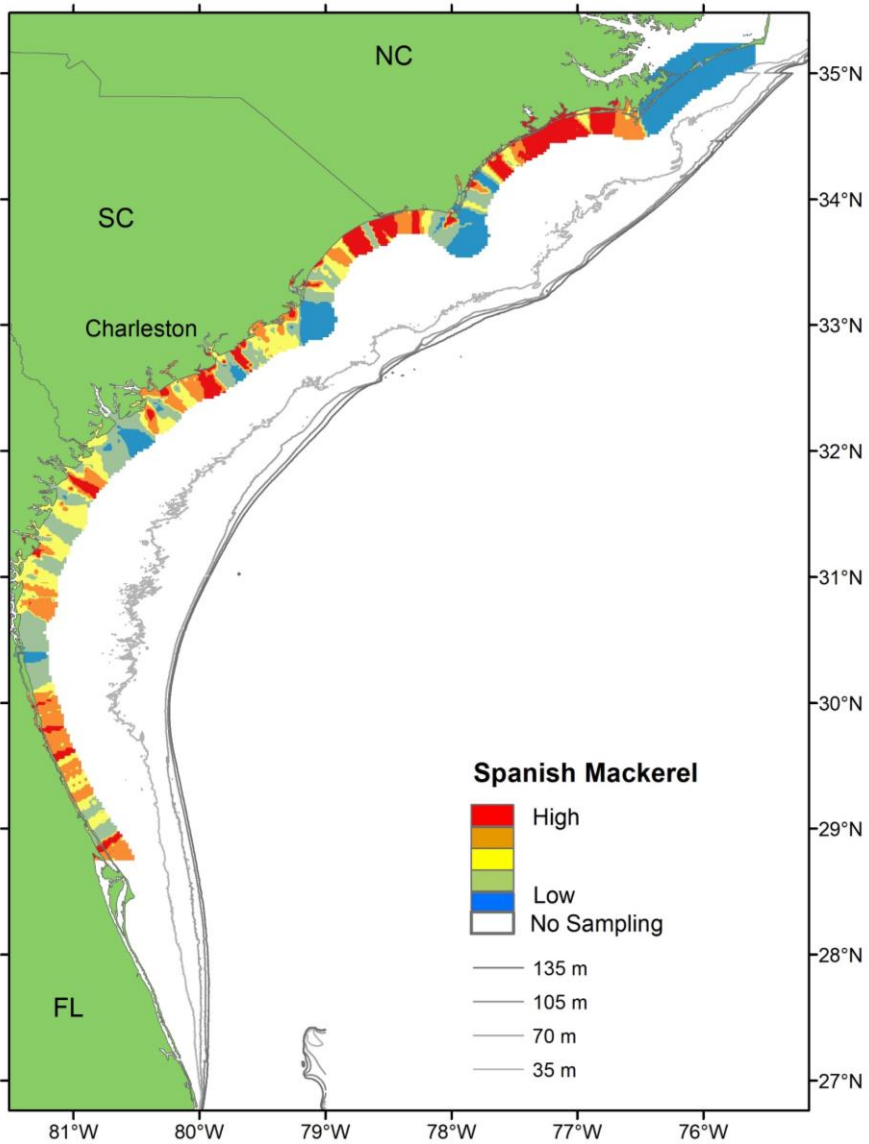

101 of 102 stations sampled in “Fall”
