

Input on Developing National Non-Fishing Impact Workshop

- what are the issues your region is facing with respect to designating EFH so that information is useful in EFH consultations with non-fishing agencies?
- do you have the information you need for the region and/or the Council to effectively consult with non-fishing agencies? if not, what is missing - data, policy, packaging of information, better communication channels between the region and the Council...
- what are interesting questions/topics/actions that your Council/region is considering at the moment related to this general topic?
- can you brainstorm other ideas that might be included in this project scope, that would benefit from regional collaboration?
- do you have any organizational suggestions for this proposal - timing (both duration and potentially timing of a workshop), potential workproducts, etc?
