Communication - Strategic Goal for Draft Vision Blueprint

Background:

In December 2012, the South Atlantic Fishery Management Council (Council) began its Visioning Project to construct a long-term vision for the snapper grouper fishery through development of a strategic plan for the fishery that would guide management actions into the future. This strategic plan, called the *Vision Blueprint*, consists of four strategic goals – *Science, Communication, Management, and Governance*. Each strategic goal will have specific goals, objectives and action strategies that will be used by the Council to guide future management of the snapper grouper fishery.

Following an approach similar to what the Mid-Atlantic Fishery Management Council used to draft a strategic plan for its managed fisheries, the Council sought stakeholder input early in the process and held a series of 26 informal meetings to solicit stakeholder input in coastal communities throughout the South Atlantic region. Because stakeholder needs and perceptions can vary widely, the Council has been careful <u>not to exclude any input</u> pertaining to the management of the snapper grouper fishery. Therefore, at this stage of the process, items that have been considered in the past as possible management tools but have not been developed further, will continue to be included among the many tools the Council may consider for long-term management of the snapper grouper fishery in the South Atlantic region. As such, the table below encompasses management actions/strategies as suggested by stakeholders in the fishery as well as those brought forth by the Council members themselves. The goals and objectives are not in order of priority and are all considered draft at this time. As the draft Vision Blueprint for the Snapper Grouper Fishery takes shape in 2015, the Council will provide their rationale for management strategies that are eventually excluded from further consideration.

Communication

GOAL: Employ interactive outreach strategies that encourage continuous stakeholder participation, supporting two-way engagement between managers and stakeholders while building a greater understanding of science and management.

Objective 1.	Strategy 1.1	Expand the use of innovative technology to improve						
Develop communication		stakeholder participation and to communicate the Counc	il					
approaches that provide		process.						
streamlined and timely information to increase awareness and engage stakeholders.	Actions:	 A. Expand the format for public hearings through the us of web-based hearings facilitated by staff. B. Utilize remote listening stations for public hearings and educational meetings to increase participation from remote groups of stakeholders. C. Change the format of in-person public hearings to match the format of the visioning port meetings (interactive, less formal, less staff). 	е					

	D.	Utilize web-based tools (webinars, video conferencing, etc.) and other technology to collect public comment and provide educational workshops.
	Ε.	Provide a comment box on the website for
	с.	stakeholders to submit comment after viewing the
		_
	E	recorded scoping presentation. Continue Q&A webinars with Council staff to discuss
	F.	
		upcoming amendments for public hearings and
		scoping.
	G.	Consider hosting webinars just for snapper grouper
		permit holders on various topics.
	н.	On the Constant Contact sign-up form, add a check-off
Churche and 1 2	1 14:1:	box for indication of the sector they participate in.
Strategy 1.2		ze the Council's website as a clearinghouse for easy to
		ess information on Council news, regulations, fishery
Actions:	A.	agement plans, and management actions. Consider use of staff-moderated chat boards for each
Actions:	А.	sector on the Council website.
	Б	
	В.	Incorporate a real-time calendar that displays current
	~	fishery closures for each sector.
	С.	Create a separate page for educational
		resources/materials produced by the Council on
	_	various topics.
	υ.	Establish a comment and suggestion box on the
		website that allows users to provide comments on a specific topic or constructive comments on the
		Council's activities and process.
	Ε.	
	с.	and other documents to evaluate effectiveness and
		access of materials on the website.
Strategy 1.3	Cons	sider use of alternative outreach approaches to further
Strategy 115		age stakeholders in the management process.
Actions:	A.	Consider using Public Service Announcements via VHF
		radio and/or local radio stations for meeting/issue
		announcements and regulation changes.
	В.	Consider an advertising campaign highlighting Council
		activities and success stories.
	с.	
		meetings/issue announcements and regulation
		changes.
	D.	Consider creation of an incentive rewards program for
		stakeholders that remain active in the management
		process.
	Ε.	Consider using recorded telephone messages to reach
		active stakeholders about Council activities.
	F.	Determine how to use web-based surveys to solicit
		input on specific management topics.
	G.	Support expansion of the Marine Resource Education
		Program SouthEast (MREP-SE) to other areas of the
		region.

			Collaborate with local port agents to serve as		
			community liaisons to convey management		
			information to stakeholders.		
		Ι.	Participate in area festivals on a regular basis.		
		J.	Consider using paid angler focus groups to solicit input		
			on specific management issues.		
			Support more informal port meetings for educational		
			purposes on relevant fishery issues/topics.		
			Conduct annual informal outreach sessions in each		
			state to discuss current and upcoming management		
			issues.		
			Diversify the locations of in-person meetings (public		
			hearings, scoping, etc.) to allow for one-on-one		
			interaction with Council members.		
			Expand the Council's social media efforts to include		
	Churche and 2.4		use of YouTube and a blog.		
Objective 2.	Strategy 2.1	Use targeted communication strategies to maintain and			
Ensure that Council	A	1	ase stakeholder engagement with the Council.		
communication encourages	Actions:		Consider use of direct mailings/other communication		
and supports engagement			strategies targeting snapper grouper permit holders		
with a diverse audience of			for significant management/regulatory actions.		
stakeholders.			Develop a list of key industry stakeholders in the		
			snapper grouper fishery and basic community profiles		
			for the region.		
			Develop and maintain a database of recreational		
			fishing focused groups (fishing clubs, bait/tackle shops,		
			dive clubs, etc.) for use in communication and		
			outreach programs.		
			Maintain a database of seafood dealers/retailers and		
			other commercial fishing businesses for use in		
			communication and outreach programs.		
			Develop 1-page fishery management resources (print		
			and electronic) for distribution to targeted		
			audiences/sectors.		
		F.	Consider use of appropriate outreach materials that		
			meet the needs of a wide generational range of		
			stakeholders.		
Objective 3.	Strategy 3.1	Supp	ort collaboration with academic and research		
Improve awareness and		instit	utions, non-governmental organizations and agency		
understanding of fishery		partn	ers on development of fishery-related outreach		
science and research and how			rams and materials.		
these inform management.	Actions:	Α.	Develop recreational angler education programs about		
these morn management.			how to reduce discards (i.e., barotrauma, best fishing		
			practices for handling/releasing fish, descending		
			devices, etc.).		
			Consider developing youth outreach materials		
			(electronic) and educational field trips related to		
			fisheries and fisheries management.		
	1	I	הארובש מות האובוובש והמהמצכוווכוונ.		

	Strategy 3.2	Support outreach programs that address the process of stock assessment and how results are used in management.					
	Actions:	 A. Develop targeted outreach programs aimed at all sectors about the Council process, including the role of the Scientific & Statistical Committee. B. Develop angler education programs about fisheries science, stock assessments and data collection. C. Expand the use of educational webinars to convey information about stock assessments, data collection, and other fishery science concepts. 					
Objective 4.	Strategy 4.1	Work with agency partners to provide stakeholders with					
Improve awareness and	information on seafood and fishing business marketing						
understanding of how social and economic issues are linked to fisheries management measures.		strategies that may increase profits.					
	Actions:	A. Add information to the website about seafood					
		marketing strategies for commercial fishing businesses (i.e., traditional model, direct marketing, etc.)					
		B. Work with MREP partners to add a seafood and fishing					
		business marketing module to the annual MREP-SE Management Workshop.					
		 C. Provide informational resources to fishermen about marketing of alternative/ underutilized species.
