

## Comment Form: Vision Blueprint for the Snapper Grouper Fishery

**Purpose:** The following questions are offered to assist you in providing your input into the Council’s visioning project. Since December 2012, Council has been working on the development of a long-term plan for the snapper grouper fishery, called the Snapper Grouper Vision Blueprint. The Vision Blueprint contains objectives and strategies for action under the four strategic goals of Science, Management, Communication, and Governance.

**How will the Vision Blueprint be used by the Council?** The Vision Blueprint will be used to help guide management of the snapper grouper fishery over the next five to ten years and will be a flexible document that will allow for changes to the vision over time as the fishery evolves. After public input is collected, the Council will have a Council member visioning workshop in October 2015 to further review public input, categorize actions into short-term and long-term action items for the fishery and prioritize short-term action items. Short-term action items will be developed into a snapper grouper amendment in early 2016.
