# Update on Headboat Data Entry

**Kenn Brennan**

**NOAA  
FISHERIES**

- The Southeast Region Headboat Survey (SRHS) completed its first year of collecting logbook data electronically in the South Atlantic and Gulf of Mexico. Since Jan 1, 2013, a total of 22,586 trip reports (96% of headboats reporting electronically) were entered electronically through the secure website and mobile app.
- Bluefin Data LLC, continues work on clickable maps and socio-economic issues for the eLog to improve the quality and type of data collected by the SRHS. Anticipated roll out: Spring 2014.
- The SRHS continues transition to an Oracle system maintained at the SEFSC to improve data storage and access capabilities for data users.
- This will be the first year estimated landings are calculated using electronically collected data. Anticipated completion time is March 2014.
