RE: Request for Exempted Fishing Permit

Dear Dr. Crabtree:

The Foundation has been awarded funds under Awards #NA10NMF4540108 and #NA11NMF4540118 to conduct research that requires the collection of characterization data in the Federal waters of the Gulf of Mexico and South Atlantic. (Proposals are attached outlining the details of this research.) To allow adequate time for the fishery observer to collect, enumerate, weigh, and identify all samples/species brought aboard a cooperating fishing vessel, the Foundation is requesting an Exempted Fishing Permit from the National Marine Fisheries Service to allow retention of Federally managed species under the Gulf of Mexico and South Atlantic Fishery Management Councils' jurisdictions. The number of specimens that may be acquired on any given trip is highly variable, and specifying the number of individuals that will be retained is difficult. However, we anticipate approximately 500 sublegal and/or legal fish could be retained throughout the course of these studies, for continued onboard examination or returned to shore for lab analysis. No species retained for scientific purposes will be sold commercially.

The Foundation's current Awards are scheduled to end on July 31, 2014 and August 31, 2014, respectively. Approximately two hundred at-sea days remain for these studies. Current Foundation contracted observers, Regional Coordinators and authorized personnel include: Frank Helies, Gary Graham, Lindsey Parker, Daniel Parshley, and Matthew Gaylord. Additional observers may be contracted during the course of these projects. Please note that contracted personnel who have undergone sea turtle training may handle threatened and endangered sea turtles that are encountered during normal fishing operations (correspondence attached).

A list of vessels available to cooperate in this research was previously submitted to the National Marine Fisheries Service for approval. Additional vessels may be identified throughout the course of these projects and will be submitted to NMFS for approval. Additionally, results of tests conducted will be provided in the final reports for the Awards issued.

Thank you for your assistance. Should you need any further information, please don't hesitate to contact us.

Regards,

Judy Jamison
Executive Director
