# Headboat Data Entry Update

Southeast Region Headboat Survey (SRHS)

- The SRHS continues to collect logbook data electronically in the South Atlantic & Gulf of Mexico:

    - Since January 1, 2013, headboat captains have the ability to submit trip reports through a secure website and mobile app using their personal computers, tablets, or smart phones.

    - As of September 1, 2013, 94% of the headboats on the survey are reporting electronically. Feedback has been generally positive, including from captains participating in the eLog improvement effort.

Headboat Data Entry Update

Southeast Region Headboat Survey (SRHS)

- The SRHS has upgraded its database to an Oracle system maintained at the SEFSC. This will improve data storage and facilitate information access of data users.

- The SRHS is currently evaluating outreach and monitoring measures pertaining to recent changes in headboat reporting requirements, i.e., electronic and weekly reporting.

- The SRHS will collaborate with SERO and Council Staff on a communications plan for these changes.
