Conservation Blueprint Version 2.0 Workshop Schedule:

The [workshops](#) to help create data-driven Version 2.0 of the South Atlantic [Conservation Blueprint](#) are coming very soon, in February and March. They're completely free and only require a one-day commitment with minimal travel! There is still space available in all 8 workshops, but they're filling up fast!

What will happen at the workshops? You'll be working with a diverse group of natural and cultural resource professionals to create Blueprint 2.0. You'll weigh potential strategies for responding to changes like urbanization and sea level rise, and the trade-offs across each using the South Atlantic ecosystem [indicators](#).

It's a fabulous opportunity to shape the future of the region and get your fingerprint on the next version of the Blueprint. Please join us---and invite your partners and colleagues! The same activities will occur at each workshop so there's no need to go to more than one. You can [register here!](#)
