**Subject:** Maynor Solorzano COMMENT CORAL 11/SHRIMP 12

I am in support of Option 2 that will allow the well established Shrimp Fishery Access Area. This will restore access back to the American commercial rock shrimp industry a small section of historic and valuable fishing grounds that were erroneously closed. Please approve and implement the Shrimp Fishery Access Area set forth in the SAFMC joint coral and Amendment 11/ Shrimp Amendment 12 Alternative 2.

I have been shrimping in the rock shrimp industry as a captain and boat owner for over 35 years with decades of experience and expertise in this fishery.

The Shrimp Fishery Access Area does not have coral in it, never has nor ever will. The bottom presented in this Shrimp Amendment isn't conducive of Oculina or any other coral formation. Anyone with any knowledge of this area is well aware of this. More areas should be re-opened to the fishery.

Maynor Solorzano
