

SAFMC Citizen Science Project Idea Portal – DRAFT Questions

Please complete the form to share your citizen science project idea with the SAFMC's Citizen Science Program. The information gathered in this form will be used to inform the citizen science research priorities which are updated every two years and guide the types of projects the Program supports and pursues. Projects developed under the SAFMC's Citizen Science Program typically do not include payment to fishermen.

- Name:
- Email:
- City:
- State:
- Association with fishery (check all that apply):
 - Private Recreational
 - Commercial
 - For-Hire
 - Wholesale/Dealer/Retail
 - Non-governmental organization
 - Other (list)
- What is the purpose of the project?
- Provide a brief description of the project idea (5-7 sentences).
- What research question or data gap is being addressed by the project?
- Does the project fit under one or more of the Council's Citizen Science Research Priorities? If so, check which items it addresses. If not, why should this be considered (e.g. how could the idea inform assessments and/or management)?
- Have you spoken with a researcher/scientist about your project idea? If so, who?
- What is the anticipated outcome of the project and how might the data be used by the Council?
- Who would the target volunteers be for this project? Have you spoken with other fishermen about the project that would be willing to volunteer? If so, how many?
- What types of project partners are needed for the project and what would their potential roles be in the project?
- What resources would be needed to complete this project?
- How much time do you think the project would take to complete?
- How much do you think the project would cost?
