OVERVIEW

Executive Order 14276 Advisory Panel Meeting

1. Executive Order 14276 Background Presentation (*Attachment 1*)

Discussion: On April 17 2025, President Trump issued Executive Order 14276: *Restoring American Seafood Competitiveness*. The Regional Fisheries Management Councils have been asked to identify actions that would stabilize markets, improve access to fishing opportunities, enhance economic profitability, and prevent closures. The Regional Fishery Management Councils must commit to a work plan that would ensure identified actions are prioritized. Staff will provide a presentation on Executive Order 14276 and what information is being asked of the advisory panels.

Advisory Panel Action: None.

2. Advisory Panel Input on Executive Order 14276 Breakout Groups Discussion:

Advisory panel members in attendance will be separated into different breakout groups based on their advisory panel membership. In the breakout groups advisory panel members will have the opportunity to provide information about their fishery and what actions would help achieve the goals outlined in the Executive Order, such as market stability, increased access to fishing opportunities, and economic profitability.

Advisory Panel Action: Discuss and provide input, as appropriate.
