THE SOUTH ATLANTIC FISHERY MANAGEMENT COUNCIL

Annual activities report

Annual Report

- Provide the Council with an annual report addressing habitat activities, including consultations, comment letters, future threats, research needs, and use of habitat policies during the prior Calendar year.
- The report is intended to provide a mechanism for keeping the Council informed of habitat activities throughout the region, highlighting the use of habitat policies, and providing advance notice of developing issues.
- The report will be finalized by the HEAP at its Spring meeting and presented to the Council at the next scheduled Habitat Committee meeting.
- The report should rely heavily on tables, texts and bulleted lists to convey the relevant information efficiently.

Emails requesting information were sent out February and March 2024 and compiled into the annual activities report draft (attachment 5b)
