The South Atlantic Fishery Management Council

Public Comment Form

Meeting

July 2023 SSC Meeting

The South Atlantic Fishery Management Council (Council) will hold meetings of its Science and Statistical Committee on July 27th from 9 a.m. until 4:00 p.m. Except for advertised public hearings and public comment sessions, the timing of agenda items may change. Public comment will be solicited at the beginning and at the end of the meeting. Those wishing to comment should indicate such in the manner requested by the Chair, who will then recognize individuals to provide comments.

7/27/2023	First Name: Rich Last Name: Eannarino Email: Re2277@yahoo.com	City: Jupiter State: Florida	Private Recreational	Sharks are the biggest problem - not limits - They eat more fish than we can land. Literally- I get bitten off by sharks in Jupiter close to 50% of the time when I have a fish worth keeping on the line...
7/29/2023	First Name: David Last Name: Fahmie Email: davidf5783@gmail.com	City: Melbourne Beach State: Florida	Private Recreational	The "overfishing of Black Seabass" is due to the extreme over abundance of red snapper. They eat all the juvenile sea bass before they have an opportunity to mature and spawn. Your mismanagement of red snapper is what is hurting our other fish stocks. They are so aggressive they are decimating everything else.
