

I support the present allocations and would encourage the adoption of the state by state system.

Sincerely,

Jim Radcliffe Eustis FL. With fuel costs at its high, it costs me \$1200.00 a trip now on a 25' grady white with twin 200's and I drive 45 miles to get to the ramp, With the restrictions in force now who can justify going fishing. The commercial guys will rape the reef so to speak. I've seen the damage that traps and longlines can do, there won't be a fish worth catching within 30 miles of shore.
