Gary Robinson 23 years commercial
fishermen. King McKreal permit unlimited
Snapper & Grouper. Spanish McKreal Dolphin & whoo

I want to say I don't see
where so many of these fish laws
can be enforced.

I want to see one or the other
pick one commercial or charter

I want to see no sale of
recreational caught fish or charter
fish

The charter boats go commercial
fishing when the kingfish are
easy and when the quote is caught
they go back to running charters
while I sit at the dock its
so not right.

I would like to see the only people
selling fish are the people who
soley depend on commercial fishing
for a living

As you can see the south Florida
charter boats and part timers do not
attend these meetings there only in it
for the money. While commercial fishing

is a way of life for myself
and many others please help us.

I would like to see use it or
loose it on the kingfish permits
only be able to sell active permits
one of last 3 years

Better monitoring of fish houses
and quality control

I would support 50 head year around
on Kingfish

no sale of Tournament fish
what so ever

90% of Charter boats in
Jupiter fl. are selling fish
while under charter I see it
with my own eyes.

They would not target these fish
like Kingfish if they couldn't
sell them.

A control date back at least
2005 on Kingfish permits

lets go back to proving
our income with Tax records
at least 75% earned income
for kingfish.

If a person doesn't want to
show Tax records you don't have
to show them a permit.

Please dont make me choose
a sector ≠ travel from FL to L.A.
every year

Q for 1 yes on Kingfish permits
we need to start somewhere

yes or no sale of commercial
permits

In closing the Kingfish fleet
in South and central Florida is
way out of hand. Way to many
charter boats and partners
people who are making some extra
spending money

And please please start closing
all the loopholes and make laws
that can be enforced. Thank you
