	Private	123,560	18	137,572	20	130,566	19	231,333	19	231,333	33%
Vermilion Snapper (ABC=629,459) (Percentages refer to preferred alternative for Amd 16)	Commercial	428,423	68	261,448	42	344,936	55	209,820	55	209,820	33%
	For-Hire	173,029	27	348,627	55	260,828	41	209,820	41	209,820	33%
	Private	28,006	4	19,384	3	23,695	4	209,820	4	209,820	33%

Note 1: The "For-Hire" heading includes headboat and charter operations.

Note 2: The pounds columns refer to the portion of the ABC implied by the percentage allocation.

Note 3: The status quo allocations used for golden tilefish are not permanent allocations. These are the allocations used in Amendment 13C only.

Note 4: Alternative 4 uses the following calculation for each sector: $(50\% \text{ * average landings } 1986\text{-}2007) + (50\% \text{ * average landings } 2005\text{-}2007)$. For example, for vermilion snapper, Alternative 4 for the private sector is calculated as $(0.5 \text{ * } 28,0006) + (0.5 \text{ * } 19,384) = 23,695$.

Note 5: Amendment 13C specified the commercial quota for golden tilefish. The recreational percentage noted above was calculated by looking at the total amount landed and calculating the recreational portion from that.
