

Red Snapper Projections VIII—Errata

Prepared by the NOAA/NMFS Southeast Fisheries Science Center

Issued: 2 March 2010

Description of errata

The report titled “Red snapper projections VIII,” issued 8 January 2010, had a typographical error in the headings of Tables 5.2–5.8. Those tables defined Pr(recover) as the proportion of replicates reaching $SSB_{F40\%}$. It should have defined Pr(recover) as the proportion of replicates reaching $SSB_{F30\%}$. Values in the tables are correct.
