Gulf of Mexico

MSFCMA

NOAA Agents from St. Petersburg, FL issued written warnings to 10 owners and operators of shrimp vessels boarded by the Louisiana Department of Wildlife and Fish for actively fishing within the Deepwater Horizon oil spill closed area. Catches from the vessels were voluntarily abandoned at sea.

NOAA Agents from St. Petersburg, FL, met with the owner of the F/V STAR CHIEF who signed a voluntary abandonment form for approximately 135 pounds of fish harvested within the Deepwater Horizon oil spill closed area. The fish were returned to the water to ensure they would not enter commerce. The case that was initiated after VMS personnel observed the federally permitted reef fish vessel operating within oil spill closed area. The owner and operator were issued verbal warnings

NOAA

The Galveston, TX field office was informed by NOAA GCEL/SE that the F/V MARGIE T was issued a \$20,000 NOVA for fishing with an expired Federal reef fish permit. The NOVA also includes a 30 day permit sanction, and the abandonment of the \$12,000 seized catch.

Lacey Act

The Slidell, LA field office received notification from NOAA GCEL that the F/V CARTAIN T was issued a Notice of Violation and Assessment (NOVA) in the amount of \$15,000.00 for fishing in federal waters that were closed in response to the Deepwater Horizon Oil Spill. The vessel was boarded by the USCG while trawling in the area. The vessel was escorted to port where SA's Campbell and Kejonen interviewed the Captain and obtained a written statement and signed nav chart. The captain voluntarily abandoned over 5,000 pounds of shrimp.

Endangered Species Act

An Agent from the Slidell, LA field office issued a \$500.00 summary settlement to the FV LINDEY NICOLE for improper TEDs.

An Agent from the Slidell, LA field office received notice from NOAA GCEL that the F/V LERIN LANE was issued a Notice of Violation and Assessment (NOVA) in the amount of \$17,000.00 for failing to have a Turtle Excluder Device (TED) sewn into its trawl. The F/V LERIN LANE was boarded in federal waters during an operation targeting shrimp vessels for compliance with TED regulations and was found with no TED sewn into either of its trawls.

An Agent from the Slidell, LA field office received notice from NOAA GCEL that the F/V SHACKBAY LADY was issued a Notice of Violation and Assessment (NOVA) in the amount of \$17,000.00 for failing to have a Turtle Excluder Device (TED) sewn into its trawl. The F/V SHACKBAY LADY was boarded in federal waters during an operation targeting shrimp vessels for compliance with TED regulations and was found in the process of sewing TED's into its trawls. The vessels captain and owner Parish WILLIAMS received information via VHF radio that his brother's vessel, the F/V LERIN LANE, had been boarded and cited for failing to have TED's sewn into its gear. In response, WILLIAMS hauled his gear and began to sew TED's into his trawl, but was boarded prior to properly installing them.

An Enforcement officer from the Slidell, LA field office received notice from NOAA GCEL that the F/V MR. WILLIAMS was issued a Notice of Violation and Assessment (NOVA) in the amount of \$17,000.00 for shrimping without a legal TED.

VMS, IFQ & Enforcement Technologies

A NOAA Agent from St. Petersburg, FL assisted USCG Sector St. Pete after receiving an emergency request to contact the FV MISS KIM. NOAA SE VMS personnel relayed the information via the vessel's VMS unit to contact the USCG.

COPPS, Education & Outreach

A NOAA OLE ASAC from Niceville, FL assisted a Panama City, FL seafood dealer in clearing up an issue preventing a company owned vessel from doing contract work for the NMFS. A records check initially indicated the vessel had an outstanding IFQ violation. Further checking revealed the vessel did not have any outstanding prior violations and was able to participate in the program.

A NOAA OLE ASAC from Niceville, FL gave a presentation detailing seafood fraud and false labeling issues to officers and investigators attending the *International Association of Natural Resource Crimestoppers Conference* in Sandestin, FL. The meeting was hosted by the FWCC with attendees from several states and Canadian provinces.

Agents from the Galveston, TX field office participated in an outreach meeting held on July 07, 2010 with shrimp fisherman expected to participate in the Texas shrimp opening. Demonstrations were given by Gear Specialist Dale Stevens, and questions were answered by SAs. As a result of this meeting, approximately 50% of the boats boarded during the Texas opening had TED's that were in full compliance with the law. The captains of these vessels were eager to tell us they had been to the meeting and had gone back to their boats and made changes to their gear in order to comply with the law. This outreach effort was considered to be a huge success and will be expanded next year.

Agents from the Galveston, TX field office traveled to Matagorda on the P/V DESTIN to train and assist TPWD JEA partners with enforcing the recreational red snapper closure in their area. Both SAs received numerous complaints regarding wide-spread violations of the closure in that area. While enroute to federal waters, the group encountered a recreational vessel with five persons on board in possession of 31 red snapper. The occupants claimed they caught the fish six miles offshore in state waters. The boarding took place three miles offshore in state waters, and the individuals were 11 fish over the state limit, there was no evidence to dispute their claim, so TPW wardens seized the fish and wrote two state violations to the captain and a passenger.

An Agent from the Galveston, TX field office served as a member of the Flower Garden Banks National Marine Sanctuary, Sanctuary Advisory Council(SAC) meeting in Galveston, TX. In addition to the SAC members, approximately 15 members of the general public and several employees of the NOAA Galveston Laboratory were present.

Training

A NOAA Agent from St. Petersburg, FL and a VMS Program Manager provided VMS and federal fisheries training to FWCC Officer trainees attending the Pat Thomas Law Enforcement Academy in Havana, FL. The training covered federal fisheries case processing along with practical overviews of the VMS program and federal fisheries enforcement.

South Atlantic/ Caribbean

MSFCMA

A NOAA Agent from Charleston, SC issued a \$1500 summary settlement to a charter vessel from Charleston, SC for failure to possess a valid Charter/Headboat Snapper-Grouper permit. The charter was boarded by SCDNR approximately 45 miles offshore Charleston with numerous species from the snapper-grouper complex.

SCALES OF JUSTICE

NOAA Agents from Titusville, FL were advised by GCEL that a settlement had been reached in an undersized sailfish and closed season vermilion snapper case. The operator and owner of the headboat MISS CAPE CANAVERAL agreed to pay the \$2,500 NOVA over five months. The case was initiated when Titusville Agents conducted a dockside inspection of the vessel in January 2010 in Port Canaveral, FL.

Puerto Rico agents responded to an undersized blue marlin complaint at the Club Nautico de Arecibo annual billfish tournament. During the investigation the subject took full responsibility for violation, and a \$500.00 summary settlement was issued.

Lacey Act

In a case investigated by agents in Miami, PESCANOVA INC (d/b/a PESCANOVA USA) plead guilty in federal District Court in Miami for the attempted import of 96,984 kilograms (approx 213,364 lbs) of toothfish in violation of the Antarctic Marine Living Resources Convention Act and the Lacey Act. As part of the plea agreement, PESCANOVA relinquished all claims to the toothfish seized by NOAA OLE. The illegal toothfish was sold through a court order with the proceeds (\$1,755,417.64) being deposited into the NOAA Lockbox. Sentencing for this case is scheduled for November 17, 2010, and PESCANOVA INC faces a possible criminal fine of up to \$500,000, or twice the pecuniary gain or loss associated with the relevant conduct, as well as a period of corporate probation of up to five years.

Endangered Species Act

A Miami agent was notified by GCEL that a NOVA was sent to the owner of the FV ST. JOSEPH for \$14,000. The vessel was actively shrimping when it was boarded in federal waters off of Louisiana and found to have one sewn TED and one TED that had evidence of being previously sewn.

Marine Mammal Protection Act

A NOAA Agent from Charleston, SC completed and referred several case packages to NOAA GCEL, regarding violations committed by the operators of commercial vessels who exceeded the endangered right whale seasonal management areas' (SMAs) 10-knot speed restrictions in waters along the east coast. The nine commercial vessels were documented to be in excess of the federal speed restrictions on at least 89 occasions collectively in the SMAs along the east coast in 2010.

Puerto Rico agents issued a written warning for a small amount of whale meat (also known as "black fish") intercepted by Customs and Border Protection officers at an airport in the US Virgin Islands.

Training

NOAA Agents from Morehead, NC provided fisheries training to multiple USCG Station personnel in Wilmington, NC. Topics covered were snapper/grouper regulations, HMS, ALWTRP and specific bluefin tuna information. In attendance were representatives from Station Emerald Isle, Oak Island, USCGC DILIGENCE and the Brunswick County Sheriff's Department Marine Unit.

A NOAA Agent from Titusville, FL conducted a patrol of the Oculina Bank HAPC aboard the USCG cutter ZEPHYR. While enroute to the patrol area, the NOAA Agent provided training to the boarding team on Oculina Coral and Deepwater Coral HAPC regulations.

At the request of the Commanding Officer of the USCG's Southeast Regional Fisheries Training Center (SRFTC), a NOAA Agent from Charleston, SC provided training to approximately 25 USCG boarding officers and gave a presentation on NOAA OLE investigations/techniques to the class at SRFTC in Charleston, SC.

NOAA Agents from Morehead, NC provided fisheries training to NC Outer Banks USCG personnel at the USCG Station Oregon Inlet in Nags Head, NC. Topics covered were Snapper/Grouper, HMS, and specific BFT information. Present were representatives from USCG Stations Oregon Inlet and Hatteras Inlet.

At the request of the USCG's Southeast Regional Fishery Training Center, Marathon, FL agents provided two training days to the USCG Sector Key West and USCG station Key West cutter crews and Florida Fish and Wildlife Conservation Officers, explaining federal South Atlantic and Gulf of Mexico fisheries as well as FKNMS regulations. Agents explained the roles that OLE and JEA partners are responsible to enforce as well as the sharing of intelligence.

COPPS, Education & Outreach

A NOAA Agent from Titusville, FL gave a presentation on Oculina Bank HAPC enforcement at the Brevard Parks - Barrier Island Sanctuary. The presentation followed a lecture by sanctuary staff about the Oculina coral habitat. The NOAA Agent also distributed the South Atlantic Fishery Management Council's Oculina regulations and dolphin/MMPA brochures.

A NOAA Agent from Titusville, FL participated in the second annual Criminal Justice Summit at Strayer University in Orlando. The summit was designed to expose students to a wide array of criminal justice agencies and careers and was hosted by the local chapter of Alpha Phi Sigma – National Criminal Justice Honor Society. Representatives from ATF, the Florida Departments of Law Enforcement, Corrections, Children and Families, Orange County State's Attorney's Office, Orange County Victims Unit, and Court Watch also participated.

NOAA Agents from Titusville, FL conducted a COPPS dockside boarding of a golden crab trap boat in Port Canaveral, FL. The vessel had approximately 3,700 lbs of golden crab onboard. The Agents provided the operator and owner with information about the new Deepwater Coral HAPC and allowable access areas.

At the request of the U.S. Attorney for South Carolina, NOAA Agents from Charleston, SC gave a presentation regarding NOAA OLE investigations to the U.S. Attorney for South Carolina and several of his federal prosecutors.

A NOAA Agent from Titusville, FL provided a federal fisheries update to the Brevard Marine Advisory Council. The presentation gave an overview of OLE, snapper-grouper amendments 17A (red snapper) and 17B (deepwater SNG), Oculina Bank and Deepwater Coral HAPCs, dolphin feeding, and right whale close approach regulations.

South Atlantic NOAA Agents attended the NC Environmental Crimes Task Force meeting in Raleigh, NC. In attendance was George Holding, the U.S. Attorney for the Eastern District of North Carolina, and William Nettles, the U.S. Attorney for South Carolina. NOAA General Counsel Chief Lois Schiffer and Deputy General Counsel Mary Beth Ward also were active participants. The NOAA Agents gave presentations related to recent NOAA OLE criminal investigations initiated in NC. Also in attendance were agents from EPA, EPA-IG, CG Fifth District, CGIS, NC State Bureau of Investigation, FBI, USFWS, US Forest Service and FDA. The meeting was organized by NC Environmental Crimes' AUSA Banu Rangarajan.

A NOAA Agent from Titusville, FL provided a presentation on NOAA OLE to college students at a "Careers in Criminal Justice" class at the University of Central Florida.

Media/ Press Release:

Marathon agents worked with FKNMS Communications Coordinator and NOAA OLE Communications Coordinator for a story in the Key West Citizen about the recovered fish traps inside of sanctuary waters. The story solicited help from the public and asked anyone with knowledge to contact the NOAA OLE office. <http://keysnews.com/node/25576>

Illegal fish traps found

BY TIMOTHY O'HARA Citizen Staff
tohara@keysnews.com

Authorities are looking for an unscrupulous fisherman, or group of them, who placed illegal fish traps off Looe Key, one of the Florida Keys' most protected and pristine coral reef patches. The first trap was found July 30 anchored to a coral head to keep it from moving from its position, and the second was found last week, both on the reef line outside of the Looe Key Special Protection Area off Big Pine Key, which is a no-fishing zone, Florida Keys National Marine Sanctuary spokeswoman Karrie Carnes said.

The traps, wire cages with no biodegradable components, would kill fish if they went unchecked. "There is no way they would open up on their own," Carnes said.

The trap, designed with apparently new construction materials, led officials to believe the gear had been put in the water relatively recently "to intentionally poach from Keys waters," National Oceanic and Atmospheric Administration Special Agent Kenneth Blackburn said. "To date we've found two subsurface traps, but there could

be hundreds more indiscriminately harvesting from the sanctuary."

Fish traps for large species such as snapper and grouper are illegal in Florida state and federal waters, though they can be used to catch small baitfish. The Gulf of Mexico Fishery Management Council banned new traps in 1987 and phased out existing ones over a 10-year period. The South Atlantic Fishery Council followed suit in 1988, banning traps in the ocean's federal waters 3 miles off the coast between North Carolina and Florida. One exception is small traps for black sea bass, mainly off the Carolinas. The Florida Legislature banned traps in state waters even earlier, in 1980, but allows traps for small bait and shellfish.

Fish traps have been a touchy issue in the Keys and across the state. Fishermen and environmentalists have long and vehemently opposed them, saying they indiscriminately catch too many other fish that die as they are brought to the surface, including angelfish, surgeonfish and other fish important to keeping reefs healthy.

North Florida's long-line fishermen earlier this year asked that fish traps be allowed again, but the fishery management councils rejected the idea.
