SEDAR 73

South Atlantic Red Snapper

Operational Assessment Terms of Reference Draft

1. Update the approved South Atlantic Red Snapper SEDAR 41 model with data through 2019. Provide a model consistent with the previous assessment configuration and revised models as necessary to incorporate and evaluate any changes allowed for this update. Apply the current BAM configuration incorporating approved improvements developed since SEDAR 41.
2. Evaluate and document the following specific changes in input data or deviations from the benchmark model.
 - Include the revised MRIP recreational estimates.
 - Consider including as an estimate of recreational catch, the alternative (non-MRIP) estimates of catch during recent open seasons that are used to evaluate the Annual Catch Limit.
 - Include any new and updated information on discard mortality rate.
 - Calculate different F metrics (other than apical F) to evaluate the status of the stock (to address shifts in the age of apical F throughout the assessment time series).
 - Address SSC selectivity concerns
 1. Consider the results of the FLFWRI cooperative research 2018 study “First direct assessment of the size-selectivity of hook and line gear, Chevron traps, and underwater cameras for Red Snapper and other reef fishes in the U.S. South Atlantic” in upcoming assessments for Red Snapper.
 2. Re-evaluate if different selectivities can be used within the combined Chevron trap/video (CVID) index or whether the Chevron traps and the video should continue to be combined as a single CPUE index given the differences in selectivity found in the 2018 FL FWRI study
 3. Re-evaluate the shape of the SERFS Chevron trap selectivity curve (flat-topped vs. dome-shaped).
3. Document any changes or corrections made to model and input datasets and provide updated input data tables. Provide commercial and recreational landings and discards in pounds and numbers.
4. Update model parameter estimates and their variances, model uncertainties, estimates of stock status and management benchmarks, and provide the probability of overfishing occurring at specified future harvest and exploitation levels.
5. Convene a panel including SSC representatives to meet via webinar and in-person, as needed

to review model development and provide guidance.

Outside of SEDAR, hold a workshop to focus on the selectivity issues regarding the Chevron trap and video indices. A report will be produced and will be reviewed at SEDAR workshop in December 2020.

6. Develop a stock assessment report to address these TORs and fully document the input data, methods, and results.

SEDAR 73
South Atlantic Red Snapper
Operational Assessment
Draft Schedule of Events

TORS and Schedule Approved	June 2020
Workshop Appointments Final	June 2020
Data Scoping Webinar.....	<i>week of July 6, 2020</i>
Raw Data Deadline	August 7, 2020
Data Webinar	<i>week of September 7th, 2020</i>
MRIP and ACCSP commercial estimates due	October 1, 2020
Updated final datasets & preliminary new datasets to Analytic Team	October 16, 2020
• <i>Includes length and age compositions</i>	
Working Paper Submission to SEDAR Staff.....	November 16, 2020
In-Person Workshop (Beaufort, NC).....	December 2-3, 2020
Post-workshop webinar (if needed).....	<i>week of December 14th, 2020</i>
Assessment webinar I.....	<i>week of January 11, 2021</i>
Assessment webinar II.....	<i>week of January 25, 2021</i>
<i>Assessment Webinar III (if needed)</i>	<i>week of February 15, 2021</i>
Assessment Report Draft to panel for review	March 5, 2021
Assessment Report comments due to editors	March 19, 2021
Final Assessment Report to SEDAR staff.....	April 2, 2021
Complete Assessment Report Submitted to Council	April 6, 2021

¹These are primary data milestones. See the data delivery timeline for specific details on when specific data components are due.

Assessment Information and Contacts

Prior Assessment: Update to SEDAR 41

Terminal year of prior assessment: 2014

Terminal year for this assessment: 2019

Lead Analysts and Agency: SEFSC, Kate Siegfried (kate.siegfried@noaa.gov)

Data Point of Contact: SEFSC, Rob Cheshire (rob.cheshire@noaa.gov)

SEDAR Coordinator: Kathleen Howington (kathleen.howington@safmc.net)

SEDAR Cooperator: South Atlantic Council
