Coral 11/Shrimp12 Amendment Comment

We have been working for years to correct Coral Amendment 8. Everyone was aware there was a mistake made that closed an area of historic rock shrimp fishing. We have attended numerous meetings and submitted numerous comments over the years and are ready for this to be corrected.

I heard Mr. Pineiro Soler state in a video the following: "true believer if you don't have strong science, should not have strong regulations".

This statement takes care of all the years of meetings and comments. If for no other reason, even if there had not been an error in closing this bottom, it should be re-opened based on this statement.
