Abbreviated Framework Amendment 3 – Blueline tilefish - Roger

Details to be added if the decision is to move forward

1. IPT:

- a) ✓SAFMC Team: Roger Pugliese (SAFMC Lead), Brian Cheuvront, Christina Wiegand, John Hadley, Mike Errigo (Data), Myra Brouwer, and Chip Collier (Coral issues), Cameron Rhodes
✓NMFS SERO Team: Mary Vara (NMFS Lead), Adam Bailey (Regs Writer); Tony Lamberte (economist); and Jeff Pulver (Data Analyst);
✓NMFS SEFSC Team: Nikolai Klibansky and Scott Crosson
✓NOAA GC Team: Shepard Grimes
✓NOAA OLE: Manny Antonaras

At the September 2019 meeting the SAFMC directed staff to develop an abbreviated framework to just be an ACL definition action

Major Steps:

- a) ✓SEDAR Stock ID Workshop – recommended 1 unit stock from the Gulf through the Mid-Atlantic; Assessment defined to cover the SAFMC-MAFMC management units, from the SAFMC-GMFMC boundary to the northern extent of the species.
- b) ✓Staff provide SEDAR working paper: Summary: Habitat and Developing Spatial Species Information for Blueline Tilefish in the South Atlantic Region
- c) ✓SEDAR 50 Assessment – dissemination to Council in September 2017
- d) ✓SSC review – October 2017.
- e) ✓Results to Council – December 2017.
- f) ✓Blueline Tilefish ABC Webinar - February 23, 2018
- g) ✓MAFMC SSC - Blueline Tilefish ABC N. of Hatteras March 14, 2018
- h) SAFMC SSC Review Workgroup Recommendations
- i) ✓The SSC was going to review blueline tilefish at the January 25, 2019 webinar which was rescheduled and took place February 25, 2019. Based on the review the SSC decided not to use the revision assessment to update the ABC recommendation they made after SEDAR 50.
- j) ✓At their April 2019 meeting, the SSC reaffirmed their previous ABC recommendations from SEDAR 50 and the blueline tilefish ABC Workgroup. Therefore, the SSC recommended that progress could commence on Amendment 38 at the June 2019 Council meeting to consider options to implement a new ABC for blueline tilefish in the South Atlantic. The revised ABC and ACL would be based on recommendations for the southern area developed as part of SEDAR 50 in combination with the approved Workgroup recommendations for the area north of Cape Hatteras, North Carolina.

- k) ✓ At the June Committee meeting, Council staff presented background on catch level recommendations for blueline tilefish and options to implement these catch levels. Recommendations are based on results of the SEDAR 50 assessment and the acceptable biological catch (ABC) for the area between Cape Hatteras and the North Carolina/Virginia border.

Proposed Timing 2019-20:

- a) ✓ Councils (South Atlantic, and Mid-Atlantic) agree on how to allocate ABC by Council jurisdiction. NOTE: The assessment TORS specified providing management information by Council jurisdiction. SAFMC discussion and guidance to staff at June 2019 meeting.

System Management Plans

Lead Staff: Chip Collier & Roger Pugliese

The System Management Plans (SMP) are intended to increase the dialogue among the SAFMC and NOAA, commercial and recreational fishers, other members of affected communities, scientists, and additional agencies and stakeholders to achieve common goals to effectively monitor and protect the resources found within the Oculina

Experimental Closed Area (OECA), Deepwater Marine Protected Areas (MPAs), and Spawning Special Management Zones (SMZs).

NOTE: At the September 2019 meeting, the Council stated that a SMP would not be developed for the proposed SMZs in NC and SC in SG Amendment 34 as the states already monitor and enforce regulations in artificial reefs.

Marine Protected Areas (MPAs) – Chip Collier

In 2009, the Council designated eight Deepwater MPAs in Snapper Grouper Amendment 14. The Deepwater SMP was developed to provide a framework to review the enforcement, outreach and education, research and monitoring, and administrative efforts in the Deepwater MPAs and track progress in each area. The final SMP contains the proposed management action items, metrics for tracking progress, and background details for the eight MPAs. The SMP was adopted in March 2016.

The evaluation report, written by the working group, will be presented to all relevant Advisory Panels (Habitat, Coral, Snapper Grouper, Information and Education, Law Enforcement, and Marine Protected Areas Advisory Panels) and the Council's Scientific and Statistical Committee in 2021. Those groups will be asked to forward their recommendation to the Council.

II. ECOSYSTEM

Lead Staff: Roger Pugliese

Fishery Ecosystem Plan II – Roger Pugliese

FEP II Implementation Plan

The Implementation Plan is structured to translate approved policy statements of the SAFMC into actionable items. The plan therefore encompasses chapters beginning with an introduction to the policy statement, a link to the complete policy statement, and a table which translates policies and policy components into potential action items. The actions within the plan are recommendations for activities that could support the Council's FEP II policies and objectives. The Implementation Plan is not intended to direct or instruct any external program, organization, or entity to undertake a specific action or to reprioritize their work or programs. The entities listed in the "Potential Partner" column are suggested partners for the actions. Each year the Habitat Protection and Ecosystem Based Management Advisory Panel, during their spring meeting, will discuss actions addressed in the previous year as summarized by Council staff.

FEP II Two Year Roadmap

This FEP II Two Year Roadmap draws from the Implementation Plan and presents three to five priority actions for each of the nine approved policy statements of the Council which would be initiated or completed over the next two years. The Roadmap provides "Potential Partners" and other potential regional collaborators, a focused list of priority actions they could cooperate with the Council on to advance policies supporting the move to EBFM in the South Atlantic Region.

FEP II Monitoring/Review:

- n) ✓March 2014 meeting: review NOAA GC report and provide guidance to staff on final approval of CE-BA3.
- o) At the March 2014 meeting, Monica Smit-Brunello (NOAA GC) advised the Council on how to proceed with CE-BA 3. Similar amendments in the Northeast Region have been disapproved due to the Anti-Deficiency Act and other types of funding requirements. If CE-BA 3 were submitted now, it would likely be disapproved for similar reasons. The New England and Mid-Atlantic Councils are working on a shared cost approach to covering the cost of observers and so the recommendation is to not take action now and monitor what is going on in the northeast. Then the Council could determine how best to proceed. The Council was also advised to address some of the discussion in the document on species-specific observer requirements.

✓At the June 2014 meeting, the Council received and update from NOAA GC and NMFS SERO on work in the northeast. The Council approved the following schedule:

- a) ✓Presentations from NEFMC/MAFMC and NMFS NER on development of bycatch reporting amendments – September 2014

The SEFSC and SERO will provide an update on their efforts at each Council meeting. The Council's intent thus far is that this would be specified in the Comprehensive Ecosystem-Based Amendment 3.

Note: The SEFSC/SERO will give a detailed presentation on the status of bycatch reporting system for the southeast at each Council meeting.

- 11. At the March 2016 meeting, the Council will receive a presentation from NMFS and provide guidance on approach/timing.

All FMPS must be consistent with this rule within five years of finalizing the rule.

Councils should conduct a review of their existing SBRMs.

The review should provide information on whether or not the FMP needs to be amended.

VII. GOLDEN CRAB

Lead Staff: Brian Cheuvront

Golden Crab Amendment 10 – Chip

Review the golden crab allowable fishing areas, consider Oculina Bank Extension boundary, review transit provisions for shrimp trawlers, and consider VMS for golden crab fishermen.

1. At the June 2015 meeting, the Council approved the following motion:

DEVELOP A CORAL AMENDMENT THAT WOULD LOOK AT ALTERNATIVES FOR EXPANDING THE NORTHERN ALLOWABLE GOLDEN CRAB FISHING ZONE.

2. At the March 2018 meeting, the Council approved a timing and task motion to include an action in this amendment that would “include options for VMS” in the golden crab fishery.
3. At the September 2019 meeting, the Council voted to remove the actions for Coral Amendment 10 that would have considered looking at adding a VMS requirement to golden crab fishing vessels and actions that would look at alternatives for expanding the allowable areas in the northern zone. Only one fisherman is actively participating in the northern zone at this time. The Council thought that if northern zone permit holders would like to explore additional fishing areas in the northern zone, they could consider applying for an Exempted Fishing Permit to collect additional data that could be informative for identifying additional areas. The EFP would have to be developed in conjunction with the Council and SERO staff to make sure it meets all the requirements for the permit, monitoring, and science. Council staff to make initial contact with interested fishermen and SERO staff will become involved if they wish to move forward with an EFP request.

Amendment 44 - Long term management of yellowtail snapper – John Hadley

In March 2017, the Council approved a motion to suspend work Amendment 44 until revised MRIP data are available. At the June 2017 meeting, the South Atlantic Council approved sending a letter to the Gulf Council to get input on development of a joint amendment to combine ACLs for yellowtail snapper. Once species are verified, one key species will be selected for length analysis to document lengths. The project is anticipated to begin in Spring 2019. Tasks completed to date include:
