Amendment 38 – Blueline tilefish - Roger

Note: At the March 2015 meeting, the Council approved the following emergency request:

MOTION: DIRECT THAT THE SSC DETERMINE, AT ITS APRIL 2015 MEETING, THE GEOGRAPHIC RANGE COVERED BY THE SEDAR 32 ASSESSMENT. IF WARRANTED, REQUEST EMERGENCY ACTION TO EXTEND REGULATIONS PROPOSED IN AMENDMENT 32, ONCE THE AMENDMENT IS APPROVED, TO THE AREAS THAT THE SSC CONSIDERS ARE REPRESENTED BY THE STOCK ASSESSMENT.

APPROVED BY COMMITTEE (9 IN FAVOR, 1 OPPOSED, 3 ABSTENTIONS)

APPROVED BY COUNCIL (1 OPPOSED, 1 ABSTENTION)

✓SSC met April 28-30, 2015 and concluded:

- SSC Consensus: After reconsideration of the SEDAR 32 assessment and all the supplemental information provided, the SSC still agrees that the SEDAR 32 assessment applies to the entire coast wide stock and is still considered BSIA.

✓SAFMC Emergency Request – send to NMFS 5/6/15. The Council's request is currently being reviewed by NMFS.

✓The Council will review the SSC recommendation and determine how to move forward with Amendment 38 at the June 2015 meeting. At the June meeting, the Council did not discuss Amendment 38 and indicated they would address this amendment at the September 2015 meeting. At the September meeting, the Council deferred action until the genetic results are presented at the December 2015 meeting.

In September 2015, the Snapper Grouper Committee reviewed an Options Paper for a possible amendment, Amendment 38, to extend the snapper grouper fishery management unit north of the NC/VA border and adjust fishing levels for blueline tilefish to account for landings in the area north of the Council's jurisdiction. The Council had considered extending the FMU previously (during development of Amendment 18) but did not take action at the time. In September 2015, the Council opted to not move forward with development of Amendment 38 pending the completion of studies on the stock structure of blueline tilefish and to allow time for the MAFMC to develop a management strategy for blueline tilefish in their jurisdiction. Instead, actions to adjust fishing levels for blueline tilefish (based on the SSC's recommendations) and revise management measures were moved to Regulatory Amendment 25 (submitted to NMFS on 3/4/16).

Details to be added if the decision is to move forward

Amendment 44 - Long term management of yellowtail snapper – John Hadley

In March 2017, the Council approved a motion to suspend work Amendment 44 until revised MRIP data are available. The Gulf Council discussed the letter at their October 2017 meeting. Marine Protected Areas (MPAs) – Chip Collier

In 2009, the Council designated eight Deepwater MPAs in Snapper Grouper Amendment 14. The Deepwater SMP was developed to provide a framework to review the enforcement, outreach and education, research and monitoring, and administrative efforts in the Deepwater MPAs and track progress in each area. The final SMP contains the proposed management action items, metrics for tracking progress, and background details for the eight MPAs. The SMP was adopted in March 2016.

The evaluation report, written by the working group, will be presented to all relevant Advisory Panels (Habitat, Coral, Snapper Grouper, Information and Education, Law Enforcement, and Marine Protected Areas Advisory Panels) and the Council's Scientific and Statistical Committee in 2021. II. ECOSYSTEM

Lead Staff: Roger Pugliese

Fishery Ecosystem Plan – Roger Pugliese

Note: The original FEP document was prepared by a very large team of technical experts from NMFS, USFWS, COE, SARP, States, Universities, Advisory Panel Members, conservation organizations and research institutions. This was the very same process used to draft the Habitat Plan. An IPT was established for the FEP Comprehensive Ecosystem-Based Amendment but one was not needed for the FEP. FEP II development process is being further enhanced through facilitated Webinars, in-person meetings and online support for Section Review and Writing Teams activities.

1. ✓Original FEP Approved by Council in March 2009 and submitted as Source Document for Comprehensive Ecosystem-Based Amendment 1 which was approved on June 1, 2010 with regulations effective on July 22, 2010.
2. FEP II Development Timing and General Process (2017-2018):

FEP II Implementation Plan

The Implementation Plan is structured to translate approved policy statements of the SAFMC into actionable items. The plan therefore encompasses chapters beginning with an introduction to the policy statement, a link to the complete policy statement, and a table which translates policies and policy components into potential action items. The actions within the plan are recommendations for activities that could support the Council's FEP II policies and objectives. The Implementation Plan is not intended to direct or instruct any external program, organization, or entity to undertake a specific action or to reprioritize their work or programs. The entities listed in the "Potential Partner" column are suggested partners for the actions. Each year the Habitat Protection and Ecosystem Based Management Advisory Panel, during their spring meeting, will discuss actions addressed in the previous year as summarized by Council staff.

FEP II Two Year Roadmap

This FEP II Two Year Roadmap draws from the Implementation Plan and presents three to five priority actions for each of the nine approved policy statements of the Council which would be initiated or completed over the next two years. The Roadmap provides "Potential Partners" and other potential regional collaborators, a focused list of priority

actions they could cooperate with the Council on to advance policies supporting the move to EBFM in the South Atlantic Region.

- o) At the March 2014 meeting, Monica Smit-Brunello (NOAA GC) advised the Council on how to proceed with CE-BA 3. Similar amendments in the Northeast Region have been disapproved due to the Anti-Deficiency Act

and other types of funding requirements. If CE-BA 3 were submitted now, it would likely be disapproved for similar reasons. The New England and Mid-Atlantic Councils are working on a shared cost approach to covering the cost of observers and so the recommendation is to not take action now and monitor what is going on in the northeast. Then the Council could determine how best to proceed. The Council was also advised to address some of the discussion in the document on species-specific observer requirements.

✓ At the June 2014 meeting, the Council received an update from NOAA GC and NMFS SERO on work in the northeast. The Council approved the following schedule:

- a) ✓ Presentations from NEFMC/MAFMC and NMFS NER on development of bycatch reporting amendments – September 2014

The SEFSC and SERO will provide an update on their efforts at each Council meeting. The Council's intent thus far is that this would be specified in the Comprehensive Ecosystem-Based Amendment 3.

Note: The SEFSC/SERO will give a detailed presentation on the status of bycatch reporting system for the southeast at each Council meeting.

11. At the March 2016 meeting, the Council will receive a presentation from NMFS and provide guidance on approach/timing.

All FMPS must be consistent with this rule within five years of finalizing the rule.

Councils should conduct a review of their existing SBRMs.

The review should provide information on whether or not the FMP needs to be amended.

After initial review, Council should review SBRMs at least every five years.
