

As specified in section 305(b)(3)(A) and (B) of the Act, the Council may comment on and make recommendations concerning any activity undertaken or proposed by any state or federal agency that in the Council's view may affect the habitat of a fishery resource under its jurisdiction. Also, the council will comment on and make recommendations concerning any activity that in the view of the Council is likely to substantially affect the habitat of an anadromous fishery resource under its jurisdiction. However, a lack of comment by the Council does not imply that an activity will not substantially affect the habitat of a fishery resource under its jurisdiction.
