IMPLEMENT THE FOLLOWING MONITORING DEVICES: VMS, REAL-TIME ELECTRONIC BYCATCH REPORTING, AND OBSERVERS. IF DISCARDS ARE GREATER THAN 24,400 LBS, PROHIBIT THE USE OF HOOK AND LINE GEAR FOR FISHING FOR MID-SHELF SPECIES. SPEARFISHING AND BLACK SEA BASS POTS WOULD BE ALLOWED. IF BYCATCH REPORTING IS VIOLATED, LOSE PERMIT. ALSO PLACE A SMALLER CLOSURE IF RED SNAPPER ACL IS MET BUT INCLUDE A QUOTA BUFFER FROM THE 24,400 LBS TO ACCOUNT FOR THE RED SNAPPER MORTALITY (I.E SOUTHERN FL AND 32 NORTH 80 WEST).

RECOMMENDATIONS (The following items are recommendations to the Council.)

Ideas to limit mortality of red snapper
(a) VMS (all vessels that harvest snapper grouper species in the EEZ)
(b) Consider recommendations from LAPP Workgroup
(c) Smaller closures closed to all fishing and target closures to spawning locations
(d) Closures that change throughout the year and location changes

(e)
A. Close 50% of live bottom off GA coast
B. 6 month closure (Nov 1 through March 31) for for-hire and pr. rec
C. Bag limit to 1/person excluding captain and crew
D. Eliminate 20” size limit
E. Maximum of 28” size limit for red snapper
F. Restrict to 1 hook per angler for hook and line fishing
G. Prohibit use of electric reel for recreational fishermen
H. Create mid-shelf spawning area with no fishing allowed
I. Artificial reef placement

(f) Implement days-at-sea restrictions, close spawning locations

(g) No sale of red snapper (partial support of Snapper Grouper Advisory Panel)

(h) No size limit option

(i) Recommendation: The AP requests that the Council consider roll-overs of underages and paybacks of overages for non-overfished species.

(j) Include guideboats with charter and headboats for consideration in a research set-aside program.

(k) Establish an ad-hoc group to discuss recreational monitoring, data collection

(l) For Florida red snapper regulations:
   1/person
   4/vessel
   excluding capt/crew
   keep size limit
   closure areas to protect spawning areas
   one hook per rod and reels, manual rod and reel only
